LM358 Import Guide

1. Ensure the model file is in the same folder as your simulation file

2. Place the spice directive to import the model: <.lib lm358.lib>. You only need to do this once
3. Select opamp2 from your component menu and change the component value to "LM385". You will need to do this for each LM385 you intend on simulating

4. In the end, you should have something that looks like this:
